Site Assurance Assessment Form

Independent Site H&S Assurance — aligned to NZGTTM G1–G8 checks and Sela priority checks P1–P5

A. Site and Visit Details

Client		**Assessment no.**	
Road / location		**RCA**	
Posted speed		**Approved TSL**	
TMP reference		**Site risk rating**	Low / Medium / High
TTM contractor		**STMS name**	
Date		**Time on / off site**	
Light / weather		**Site status**	Active / Unattended
Assessment type	Partial (G1–G8) / SCR / Sela H&S assurance	**Assessor**	

B. Before Arrival

Check	Y / N	Notes
TMP, approval and TMDs reviewed		
Previous assurance reports and open CAPs checked		
Local CAS crash history checked (TSL crashes)		
No conflict of interest		
STMS and after-hours contact numbers obtained		

C. Arrival and Safety

Check	Y / N	Notes
Drive-through completed (directions)		
Parked clear of traffic path and working space		
Arrival announced to STMS; safety briefing received		
Approval obtained to enter working space		

D. G Checks

★ = *Stop Work Order trigger if failed on an active site.*

Check	Question	Pass	Fail	N/A	Evidence / photo no.
G1 ★	STMS (or person delegated as responsible) qualification is verified relative to the worksite requirement.				
G2 ★	Temporary speed limit (TSL) is appropriate and has integrity — at least one sign at any change.				
G3 ★	Traffic travelling through the site is reasonably unencumbered and within its own dedicated path (may be part time).				
G4	On-site record (OSR) is completed and is a fair reflection of actual site condition.				
G5 ★	An approved TMP exists (and the work is not an emergency).				
G6	The TMP is present on an attended worksite.				
G7	The TMP is suitable for the actual environment, workspace, activity and hazards.				
G8	TTM closure type and broad layout match the approval.				

E. Sela Priority Checks

Ref	Priority check	OK	Issue	N/A	Notes / photo no.
P1	**Open-road approach** — Approach speeds, lead-in distance and sight lines, TSL compliance, and positive separation where crews are exposed.				
P2	**Night and after-hours visibility** — Lighting, reflective delineation, arrow boards; signs and devices on unattended sites are complete, standing and visible.				
P3	**Heavy vehicles and queues** — Queue-end protection, heavy-vehicle stopping distance, queue length versus advance warning, turning paths.				
P4	**Cyclist and pedestrian route** — A usable, continuous, signed route; no one pushed into a live lane without protection; accessible for mobility aids and prams.				
P5	**Surface hazards** — Plate edges, ramp lips, loose chip, edge drops, and potholes in the traffic path and pedestrian/cyclist route.				

F. Site Walk

Area	OK	Issue	Notes / photo no.
Advance warning			
Transition (taper)			
Buffer and work area			
Traffic path			
Pedestrian and cyclist route			
Termination			
Worker safety (positioning, plant, PPE)			
After-hours condition			

G. Findings

Rating: O = Observation · NC = Non-conformance · C = Critical

No.	Location and observation (what, where, photo no.)	Risk and requirement	Rating	Action, owner, due
1				
2				
3				
4				
5				
6				

H. Outcome and Actions

Item	Detail
Site outcome	☐ High standard / acceptable ☐ Unacceptable ☐ Dangerous
Action taken	☐ Feedback given ☐ Immediate improvements supervised ☐ Stop Work Order issued
SWO issued / lifted (times)	
CAP required	☐ No ☐ Yes — due date:
Escalated to (name, time)	
Follow-up review required	☐ No ☐ Yes — by:
Overall comments	

I. Acknowledgement

Role	Name	Signature	Date / time
STMS			
Assessor			

The STMS signature confirms the findings were discussed, not that they are agreed. The STMS's PCBU may appeal the outcome to Sela operations within 5 working days. Submit this form on the Sela platform within 24 hours with numbered photos. Phone Dangerous outcomes and SWOs through on the day: Sela operations 027 267 7264.

J. Photo Log

Photo	Time	Location / direction	Shows	Finding no.
