Course	Working with Portable Traffic Signals (PTS-01)
Completed	26 October 2026
Result	Passed - 92% (1 assessment attempt recorded)
Certificate	No. SELA-PTS-01-20261026-AB12

About this course

Safe and compliant use of portable traffic signals, from the regulatory framework and equipment standards through to placement, operation, fail-safe behaviour and handover.

Format: Online, self-paced · 30 narrated slides in 5 modules

What was covered

- Module 1: Terminology and the regulatory framework, roles and responsibilities, and why the term is "portable traffic signals"
- Module 2: Equipment and signal head standards (AS 4191), types of portable systems, key components, and signals versus Stop/Go
- Module 3: Site assessment, placement and orientation, required signage, timing and phasing, vulnerable road users, and fitting the TMP
- Module 4: Daily inspection, monitoring during the shift, fail-safe behaviour, communication protocols, and incidents and near misses
- Module 5: End-of-works removal, records and documentation, and handover between shifts and crews

What the learner demonstrated

- Explains the compliance framework for portable traffic signals under AS 4191 and NZGTTM
- Checks that equipment and signal heads meet the standard before use
- Positions, signs and times an installation correctly against the TMP
- Operates, monitors and responds to a fault or fail-safe event during a shift
- Completes pack-down, records and a safe handover

How it was assessed

A self-check quiz at the end of Modules 1–4, 80% required to pass each one.

This record summarises online learning completed through Sela Skills Hub. A Sela certificate number, where shown, confirms the result has been reviewed by Sela Civil Advisory Ltd. Practical competence on site is assessed separately where a course requires it.
